Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-7 and 10-11 are rejected under 35 U.S.C. 102(e) as being anticipated by Edens et al. (US 6,611,537).

1. Regarding claim 1, Edens discloses a unidirectional ring system (fig. 7) used in an indoor backbone network (fig. 1). The system comprises a residential gateway (item 140) to connection to a external large-capacity network, a service gateway (fig. 7, item 702) serving as the clock master to synchronize the system (col. 24, lines 57-67), several service platforms (items 708-716) for exchanging user data between a user and the indoor backbone network (fig. 1).
2. Regarding claim 2, the service platform has a detachable service adapter (fig. 5).
3. Regarding claims 3-5 and 10-11, the SPs are configured to connect to the backbone without influence and with self-IDs (col. 5, lines 45-55).
4. Regarding claim 6, the SPs transmit according to priority (col. 84, line 64 through col. 85, line 4; note: transmission precedence).

Art Unit: 2616

5. Regarding claim 7, a transmission gap is allowed (col. 6, lines 1-5).

Allowable Subject Matter

Claims 8-9 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
